Subject guide to volume 54

General methods in microscopy
High resolution transmission electron microscopy (HRTEM)
Holography
Exit wave reconstruction
Electron diffraction
Convergent beam electron diffraction (CBED)
Scanning transmission electron microscopy (STEM)
Reflection electron microscopy (REM) and reflection high energy electron diffraction (RHEED)
Energy-filtered imaging and diffraction
Scanning electron microscopy (SEM)
Scanning tunneling microscopy (STM)
Atomic force microscopy (AFM)
Miscellaneous methods

Specimen-related methods
Microscopic methods, specifically for catalysts and small particles
Microscopic methods, specifically for solid interfaces and multilayers
Microscopic methods, specifically for surfaces
In situ specimen treatment
Radiation effects (experimental)

Tools
Electron microscope design and characterization
Image detectors
Spectrometers

Theories
Electron diffraction and elastic scattering theory, image simulation
Inelastic electron scattering theory
